

Hooked

For those of you that follow my work you will see the [TheReluctantActivist.org](https://www.TheReluctantActivist.org) website has been modified to alert people to the dangers of 5G and the evil forces that are promoting this technology and the Internet of Things. By surrounding us with war, death, unresponsive politicians, big banks, Big Pharma, MSM, rampant corruption, wanton greed and unfathomable psychopathy these evil beings have eliminated any hope for change from our psyches. By engineering our public opinion and our perceptions to be hopeless they are creating a future just like the present - with them in charge and people like us feeling powerless to do anything about it. If we let them deploy 5G it will be the final solution ... *humanity's final lock down*

But there is a new boy in town. Actually this science has been around for a while but its implications are finally being realized. It has taken 300 years but Quantum Physics and Quantum Thinking are replacing Newtonian materialism. This survival of the fittest, predatory, economic death culture is finally about to end.

For years the vast majority of humankind have accepted their fate as inferior beings in a Newtonian universe where the richest and most powerful rule and lead, and the rest of us follow. This kings-and-serfs, master-and-slave mentality has been the predominant worldview for centuries and it has been a perfect breeding ground for evil psychopaths.

These evil elites have virtually destroyed our beautiful planet, brought mankind to the brink of extinction and are about to control our ability to think freely by first surrounding us with 5G radiation and then weaponizing it for total control.

We must defeat 5G and we will. We were meant to be far more than slaves to psychopaths and they know this. They know that our awareness will mean an end to this massive deception. Why do you think 5G is being rolled out at breakneck speed with no testing, wrapped in new laws that make it illegal to stop new cell towers from being erected and then guarded by police thugs.

This is a race to get humanity in lockdown before we wake up to our higher selves and the power that we possess to shut this depraved death culture down.

Ask yourself a question.

Do you really think that an intelligence that is capable of
a life of such intricacy and beauty
and a planet and a universe of such magnificence
would have created man to be a hamster
running round and round on a hamster wheel?

Wake up! You are being farmed.

I have been asked by [Prepare For Change](#) to write an article about 5G.

Before I begin though, I would encourage you to check out their website, not because I necessarily believe in THE EVENT and the Worldwide Reset as they describe. But because I found an organization whose description of how bad things are — fully resonates with my own. WOW if they concur with the level of evil that I see in the world, perhaps their message of light, life and hope is worth studying. Further, Prepare For Change is a substantial website — perhaps there are a lot more of us out there than I figured. For these reasons I have chosen to study this site and 5D.

Anyone remember smart meters? It began as a \$3.4 billion government initiative announced by Obama in 2009. The goal was to establish a smart energy grid Remember? Two years later in 2011 new digital smart meters were being readied to replace the analog meters on your house. They were used to record your home's electrical usage. Smart meters were promoted as devices that would save your money, make the electrical grid safer, were not harmful to your health and would eliminate the need for meter readers.

In my estimation smart meters have failed to deliver on every one of these promises except the elimination of meter readers. My electric bills went up, both my home and the grid are now hackable by anyone with a cell phone and the safety of pulsed radiation 24/7 for my own health let alone for a baby sleeping on the inside wall equipped with a smart meter or a bank of them on the outside wall is questionable at best.

They were rolled out by utility companies and promoted by Public Service Boards across the country much the same way as 5G is being ramrodded through now. Public notice, public health, public visibility and public responsibility all were trashed by government and media. 5G is a massive propaganda campaign. See it for what it is.

Don't you see - the Internet of Things was planned at least 8 years ago and it began with smart meters. I went to these hearings in 2011 and listened to all the bullshit. Back then I could never understand why utility companies rejected suggestions to go with wired versus wireless connections from the meter to the pole. These connections were faster, emitted NO radiation and were not hackable. This would have eliminated all the concerns. Now I understand why they were rejected.

Without wireless access to the home — your smart phone could not call your smart meter and turn your smart furnace on or your smart air conditioner off. The Internet of Things and all the smart devices being planned for the home would not be possible without first having a wireless smart meter to provide wireless access to the home.

The invisible hand of evil has been the guiding force behind this communication deception just like it was with the tobacco debacle years earlier. Then it took decades and millions of people to sicken and die before all the officials running away and hiding became just too obvious. They were then forced by the public to do something.

We have come full circle and just like tobacco government and media are in full collaboration and collusion again to ensure the public that all is safe. The military so wants this that Trump recently declared 5G a National Security issue. Every time I turn around I see more blinking neon signs.

Wake-the-f... up. This goes way beyond Democrat or Republican anything. This is deep dark disgustingly evil stuff. Getting parents to radiate their babies in their cribs and their children at home and in the schools is pretty bad — can you imagine anything worse? Can you imagine an industry that knowingly lies about the safety of its products and tricks parents into jeopardizing the health of their own children? This is sick shit.

Each computer or any RF device must conform to FCC safety standards. But, the FCC does not limit the number of devices one is exposed to. In other words the cumulative effect is ignored. The safety standards are the same whether there is 1 or 100 computers in the classroom or 1 or 100 baby monitors in the crib. Whether the exposure to RF is 10 minutes or 10 years is also not measured. Consequently radiation levels that humans are exposed to are off the charts. We all now receive unhealthy doses of radiation 24/7 and 5G will make that 25 or 30 times worse. Ten years out? Who knows?

In partnership with the rich elite and under the cover of media our evil government has lied about asbestos, tobacco, fluoride, nuclear waste, nuclear safety and TSA X-Ray machines, Fukushima, GMO's, roundup, aspartame, opioids, H1N1, safe vaccines, fracking, environmental toxins in our air, water, soil and in our food, agent orange and depleted uranium which have left legacies of deformed babies around the world. Meanwhile the environmental destruction of our oceans, the forest, our waterways and the natural habitat our animals has all of life gasping for relief.

We have an economy that is dependent on manufacturing and selling things that kill — from bullets to airplanes, boats, missiles, chemicals and who knows what? We have a fraudulent Homeland Security system that manufactures terrorism, falsifies reports, invades our privacy, destroys our freedoms, fills us with fear and promotes a Gestapo like police force. We have a fraudulent military that makes war constantly from over 300 military bases all over the world but never stops or prevents them. We have a fraudulent Justice System that makes it legal to commit crimes against humanity but illegal to try and prosecute them. We have a fraudulent Banking System characterized by the Federal Reserve System that creates money out of thin air, the IMF and the World Bank. Our perceptions are engineered first by Hollywood who shapes our entertainment mind while MSM engineers our perceptions and public opinion. We have a fraudulent Academic system that is based on compliance with mainstream thought and science. What used to be a bastion of free thinking and discussion has collapsed into Free Speech Zones. Academia has been added to MIC it now the Military-Academic-Industrial-Complex. Let's not forget Big Pharma, Big Ag, Monsanto, Bayer etc. and now we got 5G.

Why do we keep accepting blatant lies? Are we genetically flawed? Are we in a trance? Have we been drugged? What is wrong with us? First we allow ourselves to be enslaved in this death culture and then we line up to use the services of Amazon, Facebook, Twitter, YouTube and Google — all who actively engage in censorship. In exchange for what we think are free services we give away our free speech and our privacy. Facebook recently hired 10,000 trolls who are paid to recast criticism and protest as hate speech. Deboosting is a common practice at Facebook and YouTube. **Google has been caught** manipulating search results more than once. It seems we will we give away our first born for a buck, Yet while humanity is being decimated — we do nothing. Are we too scumbags like our evil overlords or are there other forces at play?

This seems like a serious attack on our consciousness to me. This is organized, systemic and sophisticated mind control and a well integrated disinformation campaign orchestrated through government, industry and mainstream media. Humanity believes that upside down is now right-side up and as George Orwell would say that war is peace, freedom is slavery and ignorance is strength.

One cannot talk about mind control without discussing the undisputed heavyweight champion of the world — Mainstream Media (MSM). MSM is fed new leads from Rothschild owned and controlled wire services of Reuters and the Associated Press. Editors are then paid to oversee **often identical** and always engineered, news scripts across all the major networks. The evening news is written, controlled and engineered to shape public opinion and perception.

Don't you see? The goal here is to program your perceptions 24/7. MSM works with government and the Deep State to engineer what it is you perceive, to overwhelm you with depravity, fear and hopelessness. In this way you will perceive and envision and thus manifest, a new world exactly like the one we have now. After all why would the 1% want it any other way? MSM is a Ministry of Propaganda of monstrous proportions.

You owe it to yourself to **check out some of these alternative news voices** - and compare them to MSM.

Judge for yourself which source is real and what is fake.

They (the evil elite) under the cover of the Internet of Things and 5G will be laying down an invisible but fully weaponized grid that will keep you numbed, dumbed and fully under control.

This is a war for control of your mind and to limit your ability to think freely about having a higher purpose, reclaiming the growth of your soul, and realizing a higher state Consciousness. This is what is under attack. This is not about the ability to download a

movie in few seconds or to communicate with millions of new smart devices. This hype, deception and diversion is being played out by the FCC, industry, government and media to distract us from the real mission.

David Icke says our final take over will be a nine step plan :
Step one of this plan is Control Perceptions as are the remaining steps 2-9.

I am sure my next comment will trouble you as IMO even God has been used to scam us. We have been taught that we are born into sin and to never challenge or criticize authority and to be good followers of rules and regs with narry a question. We have been taught to suffer here on earth, to turn our cheek, and to be meek. We are taught that it is OK to suffer and to forego earthly pleasures while we are alive so that we will attain heaven when we die.

To this I say BULLSHIT. One can love God and/or source while loving and enjoying the abundance and the diversity of this beautiful planet before we die. Earth is not just for the rich.

Don't you find it a tad coincidental that at this time of worldwide depravity, heinous sexual crimes, human trafficking, pedophilia and in a world screaming for morality, spirituality, and leadership that not one religious figure has stepped forward — not one?

Finally morality, integrity, peace, justice, life, love and abundance are coming back to the planet. **Quantum Physics** is about to end hundreds of years of depravity. Bye Newtonian science. Bye Bye psychopaths. Bye Bye OWO (Old World Order) the rules of the game are about to change.

Quantum Physics and Quantum Thinking are replacing Newtonian physics as mainstream science. Newtonian reductionist materialism has been shaping human thought for 300 years and it is finally coming to an end. We now know that consciousness - not materialism - is the true fabric of the universe.

Just as Galileo and the telescope reversed years of incorrect thinking and faulty science, Quantum Physics will undo years of limited master/slave thinking. We are infinitely more powerful. We can intend, believe and create new futures.

Global Consciousness will return choice back to the masses and this is why evil is so petrified. This is what lies behind the mask of the Internet of Things and 5G. They know that when humanity fully embraces this Quantum knowledge that they (the public) can then actually intend and manifest evil right out of existence. They are applying this same knowledge now to control our perceptions and our beliefs such that we cannot envision a world that is different than the one we got. This is the real reason why 5G must be defeated. We must win this war to reclaim control of ourselves, our souls and our minds.

Orwell said "In a time of deceit, telling the truth is a revolutionary act". Media has now suppressed so much evidence and covered up so many lies by the telecom industry — that asking for the truth is now considered hate speech while lies and deceptions are treated as truth.

First let's disprove this **no testing horseshit**. there are hundreds of peer reviewed reports on 5G around the world. All of them document health implications that are overwhelmingly negative.

Second. These telecom criminals are not funding any new studies on 5G because they know that the results will also be overwhelmingly negative.

Third. Knowing full well that initial health reports are all negative and knowing that the public has huge concerns for public safety - the FCC along with the telecom industry, media and government are still proceeding full steam ahead. In fact the government is now telling us that 5G is a National Security issue. This fact alone tells you everything you need to know about evil and the US government.

Fourth. These evil incarnates are hoping by the time this technology is proven unquestionably unsafe that consumers will be so hooked that they will not care about zillions of new smart gadgets radiating 24/7 and giving us cancer just like cigarettes did years before. But unlike smart meters, there will be no opting out.

The FCC Safety Regs

“Around the world we are paying the price now for having delayed actions on tobacco and asbestos after insisting on human harm before taking action. We cannot afford to wait for definitive proof of human risks from radiation emitted by wireless transmitting devices before taking steps to reduce exposures.” Devra Davis PhD MPH, President of Environmental Health Trust.

**Are total Bullshit
They are
designed to feed evil and deceive the public.**

1. They were originally written in the 60's to prevent a 220 lbs military man from acquiring radiation burns while working on radar towers. Current testing procedures do not consider the the smaller size of children and teen brains. Nor have additionally safety standards been established for children, infants, babies or life in-vitro.
2. Non-thermal radiation exposure is considered dangerous for your health — yet FCC safety standards exclude them entirely. "The electromagnetic radiation standards used by the Federal Communications Commission continue to be based on thermal heating, a criterion that is now nearly 30 years out of date and inapplicable today" **Willie Taylor, US Department of the Interior.**
3. These standards apply to one device only. Nothing addresses the cumulative affect of billions of devices, all emitting radiation at so called safe levels. 1 or 100 baby monitors in the crib or 1-100 computers in the classroom are all treated the same Similarly FCC safety guidelines treats 10 minutes or 10 years of continuous exposure exactly the same way .

This Health Risk Organization tells us that new small cell towers are more dangerous than standard cell towers for two main reasons. First, compared to earlier versions, 5G is ultra high frequency and ultra high intensity. 1G, 2G, 3G and 4G use between 1 to 5 gigahertz frequency. 5G uses between 24 to 90 gigahertz frequency. Within the RF radiation portion of the electromagnetic spectrum, the higher the frequency the more dangerous it is to living organisms.

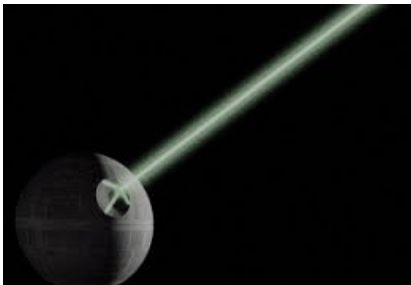

Second, the shorter length millimeter waves (MMV) used in 5G do not travel as far or through objects. This means with our current number of cell towers the cell signal will not be reliable. To compensate, many more mini cell towers must be installed. It is estimated that they will need a mini cell tower every 2 to 8 houses (every 250 - 500 feet) This will means millions of new smaller cell towers in our neighborhoods.

With RF radiation, how close the source is to our physical bodies, is more damaging than the power level (or wattage) of the radiation. RF radiation dissipates with distance. In other words, a low powered exposure right next to someone, is more dangerous than a more powerful exposure a long ways away. Also the longer the exposure time, the more dangerous it is.

5G will be the worst of both worlds. We will have more sources around us, and they will be closer to us. This does not even include millions on new smart devices that will all be emitting 5G radiation communicating with cells phones and these new cell towers.

In 2011 the WHO (World Health Organization) classified cell phone technology as a Class 2B potential carcinogen. That was eight years ago. Let's see 3G and 4G technology are already considered a potential carcinogen. 5G is a minimum of 25 times more powerful and it will be bouncing radiation around millions of new smart devices and millions more new cell towers.

If all this is not bad enough the FCC is now bringing 5G into space.

20,000 Satellites are to be launched sending focused beams of intense microwave radiation over the entire planet.

HELLO

is anybody home? Are you getting the picture?
Do the words tobacco or cancer ring any bells?
Are you incredibly stupid or just brainwashed?

The amount of radiation that humanity will be exposed to will sicken and likely kill many of you. You might as well stick a cigar in your baby's mouth along with some *SKOAL*. This is another tobacco scandal of monstrous proportions being waged in plain view by your government, media and industry.

Get a grip this is pure evil coming to you from the depths of Hell. The rich elite have been groomed by evil to lord and master over you ... but wait wait ... many of you are now beginning to wake up to these deceptions. Evil planes to nip this growing awareness in the bud. Time to implement the final lockdown. Time to prevent humanity from realizing their quantum nature and what they are true capabilities are.

Time for 5G and the Internet of Things. Through these technologies we will be able to control what the plebs think and punish them when they get out of line. No protests, no criticisms, no change will be tolerated accept as we the evil elite determine. This death culture, of fear, suffering, suppression oppression, starvation, spiritual emptiness moral depravity and greed will continue to keep the few who are properly ordained, fabulously wealthy.

The government knows this, industry knows this, media knows this. This goes beyond bad rich men. This is truly sick men working with evil forces to put humanity away. This is it. 5G gives the Deep State everything it needs to stunt your evolutionary growth and your ability to challenge corporate corporate monopolies, These criminal cabals have been withholding free energy and holistic health solutions by controlling your ability to think independently and to question authority.
